Installation steps

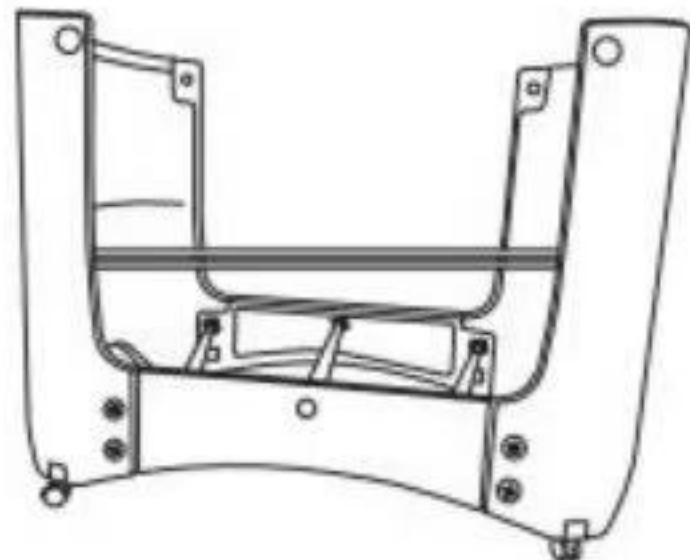

1. Connect side plate A to side plate B and tighten with small nuts.

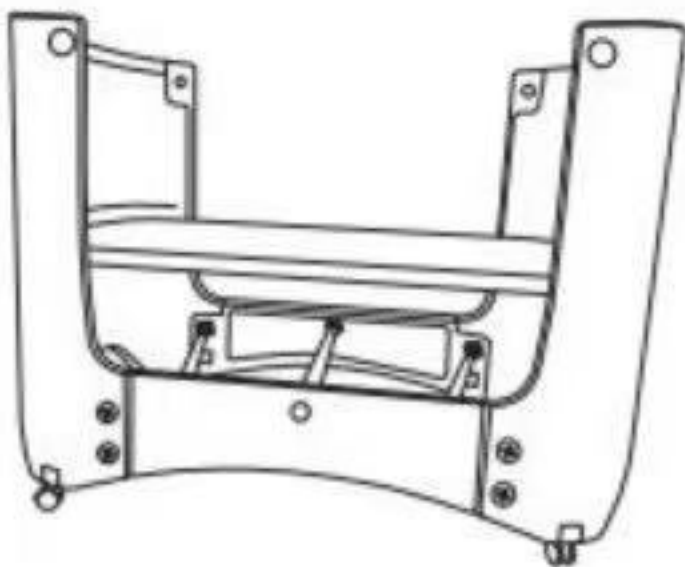

2. Install the pulley to the bottom of the side plate and tighten it with an iron screw.

3. Connect the baffle plate to the side plate AB and tighten it with a small nut.

4. Attach another set of side panels to the other side of the plate with a small screw cap and secure the support at the corresponding position of the plate.

5. Place the bedboard in the middle of the care table and fix it with a small screwdriver.

6. Stick the fence on the side with a small screwdriver and the installation is complete.

WARNING

Do not let all plastic bags and packaging materials come into contact with children until they are dusted, disposed of and disposed of. Do not use this baby crib product when any parts are broken, torn or damaged. Please use manufacturer certified spare parts. The product may only be used if all the locking structures are jointed. Carefully check that they are rodent before use. The lowest position on the bed surface is safest, as long as the child is old enough to sit. Kneeling or standing up, the bed surface should always be used in the lowest position. If you leave unaccompanied children in fenced and similar-purpose cots, always make sure the sideboard is in the highest position. Do not place anything in the crib or near other products such as curtains, ropes. Doing so will provide a landing point for the user or risk asphyxia. Avoid using open fires and other heat sources near the product, such as electric sparks, gas flame, etc. If you are placing your child in an unattended crib, make sure that the moving side is closed. If possible, it is recommended to clean and maintain fencing and similar child beds frequently. Do not use more than one mattress in a crib. Do not add another mattress to this mattress. There is a risk of choking

To use, you should know:

1. Use environment: Suggested indoors and in a safe environment accompanied by an adult;
2. This product is suitable for use by infants and toddlers aged 0 to 36 months with a maximum weight not greater than 30 kg;
3. If you leave unaccompanied children in the bed, always make sure the side armrest is in the highest position. The side panels are fully closed while protecting the screwdriver control
4. The product can only be used if all the locking structures are jointed. Carefully check whether they are rodent before use;
5. All assemblies should be properly fastened;
6. When used as a crib, it can no longer be used without a bed surface;
7. Note on the thickness of the mattress: When the bed surface is in the lowest position, the inner height (from the surface of the mattress to the upper side of the bed frame) should be at least 500mm.
When the bed surface is in the highest position, the inner height should be at least 200mm. Recommended mattress size: 62 x 112 x 5.5cm;
8. When the child can climb out of the bed or the height reaches 1200mm, should stop using the baby bed function of this product;
